

Adeyemi Olusesi

AI TRAINER & DATA QUALITY SPECIALIST

+1 347 221 5415 | Olusesiadeyemi55@gmail.com

PROFESSIONAL SUMMARY

Results-driven AI Trainer and Data Quality Specialist with proven experience in prompt design, structured model evaluation, and large-scale content annotation. Highly proficient at assessing AI-generated outputs, pinpointing failure patterns, and crafting superior responses that meet the highest benchmarks for accuracy, tone, and depth. Combines a solid computer science background with outstanding written communication abilities and the self-discipline needed to excel in remote, asynchronous AI training workflows. Deeply committed to advancing the quality, safety, and usefulness of next-generation AI systems.

SKILLS

AI Model Training & RLHF • Prompt Design & Iterative Optimization • Data Evaluation & Quality Assurance • Response Scoring & Structured Feedback • Text Analysis & Content Refinement • Multimodal Evaluation (Text, Image, Video) • Instruction Following & Edge Case Detection • AI/ML Human-in-the-Loop Workflows • Consistency Checking & Attention to Detail • Google Sheets / Microsoft Excel • Remote Collaboration & Async Communication • Annotation Tools: Prodigy, CVAT, VGG Annotator

PROFESSIONAL EXPERIENCE

AI Trainer & Prompt Specialist (Remote)

Freelance / Contract

- Developed and curated high-quality training datasets for generative AI models, ensuring outputs were precise, logically structured, and closely aligned with user intent across a broad range of task types.
- Assessed and ranked AI-generated responses using detailed evaluation rubrics, delivering well-reasoned written justifications that strengthened Reinforcement Learning from Human Feedback (RLHF) pipelines.
- Crafted and continuously refined prompts to drive optimal model behaviour across domains such as logical reasoning, coding support, creative writing, and knowledge-based question answering.
- Detected model failure modes, instruction-following breakdowns, and potential safety gaps, documenting findings with clear written rationale to enhance training signal quality.
- Transformed low-quality AI outputs into polished, ideal responses — carefully balancing factual accuracy, appropriate tone, and thoroughness in line with project rubric standards.
- Carried out multimodal evaluation tasks spanning image comparison, visual anomaly detection, video summarization, and short-form dialogue generation.
- Consistently surpassed daily quality and accuracy targets across high-volume, time-sensitive task environments.
- Worked effectively within distributed remote teams, rapidly adapting to shifting guidelines and annotation frameworks across multiple simultaneous projects.

Data Evaluator / AI Content Reviewer (Remote)

Freelance / Project-Based

- Assessed and scored AI-generated content for factual accuracy, contextual relevance, helpfulness, and clarity across a wide spectrum of subject areas.
- Delivered structured, insightful written feedback that directly contributed to iterative model improvement and output quality enhancement.
- Maintained a strong track record of reliability, precision, and consistency throughout sustained high-volume evaluation engagements.

Adeyemi Olusesi

AI TRAINER & DATA QUALITY SPECIALIST

+1 347 221 5415 | Olusesiadeyemi55@gmail.com

- Adhered rigorously to detailed and frequently revised project guidelines, consistently meeting and surpassing established performance benchmarks.

Software Data Analyst — Volunteer

Volunteer / Community

Google Developer Groups (GDG)

- Served as a Software Data Analyst volunteer, applying technical skills to support community-led technology initiatives and developer programs.
- Contributed to data gathering, cleansing, and analysis workflows that informed planning and reporting for developer community events.
- Leveraged spreadsheet tools and data interpretation skills to produce organised, actionable datasets for community stakeholders.

CERTIFICATES

- Microsoft Office Proficiency — Expert in Microsoft Word, Excel, PowerPoint, and Outlook.
- Data Annotation and Labeling for Machine Learning — Udemy (2021).
