Professional Summary

Innovative and results-driven Mobile App Developer with over 5+ years of experience in designing, developing, and managing cutting-edge mobile applications for iOS and Android platforms. Skilled in Dart, JAVA, Kotlin and Flutter, I have a proven track record of delivering high-quality, user-centric solutions that exceed business objectives and user expectations. Seeking to leverage leadership, communication, and technical expertise to foster innovation and collaboration.

Employment History

Mobile App Developer, Dataknead Limited, Abuja

01/2024 - Present

- **datride:** Led a team in developing a highly efficient e-hailing app. a true competition to bolt and uber. integrated google maps directions API and geo-locations API to Web and mobile App. [Mobile & Backend] **Technologies used:** java,/kotlin, nodejs, Android sdk, swift, firebase, mysql, tomcat server, jenkins.
- **Kenmauk :** Implemented an information system App that helps new residents in the UK to navigate the City, get jobs and manage opportunities. [Mobile] **Technologies used:** Dart, Flutter, spring, java, postgres.
- **datride V2:** upgraded a highly efficient e-hailing app. a true competition to bolt and uber. moved the whole system from Native to Flutter. [Mobile] **Technologies used:** Dart, Flutter.

Achievements:

Contributed to a significant user growth, with Kenma UK and Datride collectively achieving over a 50% user growth in the first few months and expanding global reach.

Software Developer, Byteworks Technologies Solutions, Abuja

01/2022 - 01/2024

- **Projects:**
- **Expira:** Designed and implemented a robust business engine for creating and managing invoices and requisitions [Mobile, Backend & Web]. **Technologies used:** Flutter, Dart, Java, Hibernate, Redis, PostgreSQL, Spring Boot, TypeScript (Angular), Keycloak, tomcat server.
- **VerifyID:** Developed a system for quick identity verification including liveness check, biometric adjudication, and deduplication. [Backend & Web] **Technologies used:** Java, Hibernate, Redis, PostgreSQL, Spring Boot, TypeScript (Angular), Keycloak.
- **eCadence:** Automated Project management and execution tool. [Mobile & Backend]. **Technologies used:** Flutter, Dart, Java, tomcat server, Redis, PostgreSQL, Spring Boot, TypeScript (Angular), jenkins, Spring microservices.
- **Diplomatic ID:** Collaborated with the Ministry of Foreign Affairs to build an identity and document management system. [Backend & Web] **Technologies used:** Java, Hibernate, JavaFX, SpringBoot, microservices, typeScript(Angular)

Achievements:

- Significantly improved ETL performance, reducing processing time from 625 days to 13 days.
- Enhanced high availability verification system, resulting in a 20% reduction in downtime.
- Spearheaded the development of an Identity Verification System with face liveness verification.
- Implemented dynamic customizable business stamp that drastically increased the amount of users interaction on the business engine.

- Developed a Bash script to streamline software deployment by installing required dependencies and configuring servers, reducing reiteration time by nearly a full day, thereby optimizing efficiency.
- Designed and implemented a specialized production system monitoring dashboard, providing real-time data tracking for crucial metrics, contributing to more informed decision-making.
- Created algorithms, flowcharts, and implemented normalized database models and data layers to ensure efficient data management and retrieval.

Software Engineer, Dutch Technologies, Abuja

03/2019 - 12/2021

- **Projects**
- **Afriprize:** Designed, developed and deployed value focused and mobile friendly E-commerce applications deployed to playstore and Appstore with over 1k users. [Mobile & Backend] **Technologies used:** Nest.js, TypeScript, Flutter sdk, dart, firebase, mysql, tomcat server, aws.
- **E-goona:** Led the creation of an Efficient Farm Management System, introducing dual interfaces for farmers and users. Implemented multilingual support with voice-over features, fostering inclusivity. Integrated e-commerce capabilities for seamless transactions.[Mobile & Backend] **Technologies:** Android Sdk, Firebase services, java, kotlin. XML.

Achievements:

- Integrated google maps directions API and geo-locations API to Web and mobile App to show user's locations and track users' live movement of drives..
- Implemented Verification and Authentication Rest Apis using Springboot.
- Integrated Voice-over and talk back to e-commerce system

Software Engineer Intern, Abuja Chamber of Commerce and Industries, Abuja

06/2018 - 02/2019

- **Projects:**
- **ACCI Website:** Designed and developed a user-friendly dynamic website for an the Institution that helps foreign deplomats gain first hand info, set up the web server and handled hosting on Linode.
- **Attendance:** Implemented Staff attendance system that helped manage staff data with RDBMS and track timing using fingerprint device
- **Payment auth:** Integrated an online payment system with a webhook for fast confirmation of offline payments and customized user authentication, email confirmation and password reset functions to website.

Education

Bsc. Software Engineering, Nigerian Army University Biu

09/2017 - 09/2020

- Graduate with a Cumulative Grade Point Average (CGPA) of 3.21 out of 4
- Researched and developed an autonomous spray robot and an Arduino-based smart greenhouse.
- Developed RFID based identification Software that helped cub security risk of ID card forgery in the institution
- Developed a Bash script to streamline software deployment by installing required dependencies and configuring servers, reducing reiteration time by nearly a full day, thereby optimizing efficiency.
- *Google Developers Student Club Lead - Google - January 2019 -November 2021*

Personal Projects

Projects

- Created A robust mobile application that helps institutions onboard students(biodata and biometric), Staffs(Biodata and biometric), take their attendance, authenticate them for eligible exams. store and retrieve their data as when needed using Java, Kotlin and Android SDK.
- Built a mobile App using Flutter and firebase to Keep track of basketBall team scores Manage team fouls, Keep track of team turnOvers with Active game-time and shot-clock time movement.
